Accessible MSN

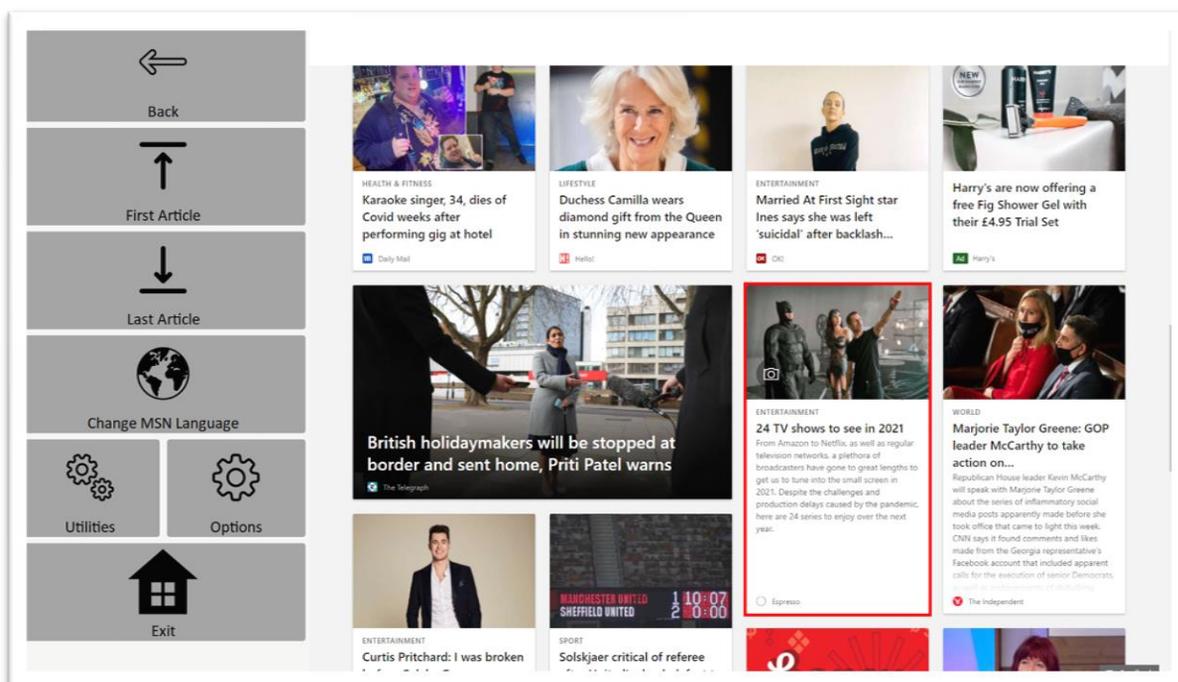

Getting Started

- Requirements – there are no special requirements to use MSN.
- Language and Region selection – MSN selects app language and content automatically. You can change the language and region at any time.
- To change the selections the first time you use MSN – click **Accessible MSN** from your Home Page, click **Info** => **Change MSN Language**. A table of the available languages will appear. After selecting a language, you will be able to select a country.
- You are now ready to use MSN. Select **Continue to MSN** to start using the app

Home Page

- **Scroll Through Ads / Skip Ads** – toggle between scrolling through and skipping ads. Button caption changes accordingly.
- **Menu** – go to MSN menu.
- **Select Category** – filter the articles shown to you by the categories offered by MSN (see [Page 7](#)).
- **Up, Down, Previous** and **Next** arrows – a red border frame is always shown around one of the articles to show which one is currently selected. Use the arrows to move the frame (skipping ads if **Skip Ads** is on).
- **Open Article** – open the selected article. Buttons on the opened page depends on the content of the article (video, pictures gallery, “regular” article...)
- **Read Title** – read the title of the selected article aloud.
- **Slider** left and **Slider** right – These buttons appear only if the selected item has a “slider” – usually the top left item on the page. Allows you to browse the content of the slider, while skipping ads.

Menu

- **First Article** – takes you to the top left article on the page.
- **Last Article** – takes you to the last article on the page (the last article in the browser cash).
- **Change MSN Language** – change MSN language and region settings.
- **Utilities** – recover / reopen MSN, **Block Touch** or **Allow Touch** access, close windows you do not need, close pop-up messages, zoom in or zoom out,...
- **Options** – change the computer volume, turn auto-read of titles on and off, turn auto-read of articles on or off, toggle text enlargement, go to additional advanced MSN options (text enlargement factor, max words for auto-read), and access the [Join-In Settings](#) app..
- **Exit (Communicator Home Page)** – exit Accessible MSN

Regular Article

- The buttons you see on an article viewing page depend on the type of article you have opened. The image above shows a regular article.
- **Exit Article** – back to MSN home page..
- **Reading Enabled** – change the behavior of the page and reveal buttons to use in **Read** mode.
- **Up / Down** – scroll up and down the page.
- **Video / Gallery** – if a red border frame appears around a media item at you scroll through the article, you can use these buttons to access buttons for interacting with it.
- **Options** – access and adjust a selection of useful settings without needing to go back to the menu and options page. You can change **Computer Volume**, **Auto-Read** preferences and toggle **Text Enlargement** here.
- **More For You** – when you see the **More For You** section of suggested articles at the bottom of the page, you can click here to access them.
